Vehicle Communication
Radio

LM500C

The path of adapting Broadband Push To Talk to enterprise instant communication has been evolving, especially in today's changing environment. The LM500 helps frontline workers and fleets to stay connected, and greatly enhance the safety and productivity in the field. The LYNKSYS LM500C has been an ideal PoC device to run PTT applications allowing trucks and commercial vehicles to embrace the benefits of nationwide Push To Talk instant communications.
